

COLOR PHOTOGRAPHY

5.27.2016

WITH STUDENT LEARNIG OUTCOMES

Color Photography (PH231, 4 credits)

Course Description:

The fundamentals of color theory and the digital color ink jet process are presented in a computer lab setting. Assignments investigate the use of color in photographs as an expressive tool and draw upon digital and analytical skills explored in earlier classes. Examples from current and historical photographers are used to illustrate successful examples of the ideas explored in assignments. Group and individual critiques focus on specific issues explored in assignments, content and craft. An extended project, often in book form, acts as a capstone project for the course.

Prerequisite: Photo II & Foundation Year or transfer credit

Students will:

1. Demonstrate the ability to identify color temperature of light and to use color in a variety of forms as an expressive tool in color inkjet photographs. (PC 1)
2. Manage the use of appropriate digital techniques for image adjustment. (PC 1,2,4)
3. Create a capstone project including a minimum of 16 images in a portfolio and/or in the form of a book or instructor approved format. (PC 1, 3, 6)
4. Research and emulate a photographer's work using color photography. (PC, 4, 5)
